Highway Post Brackets			
Quantity	Price Each	Shipping	
1	\$5	Based on Quant Ordered	Sold in pairs a set is required for each highway post/predator guard

The ABC guard and bracket are designed to be used with highway signposts. The steel brackets are pre-bent to 40° and holes are provided to bolt the brackets onto the signpost. The MWI style guard is meant for use with a landscaping timber or 4X4 post. Instead of brackets, the guard uses metal 'flaps'. Woodscrews driven thru the flaps secure the guard to the post. If you have questions about the predator guards or wood duck nesting please contact a member of Prairie Pothole Chapter.
